The Inventory Money Leak Checklist

8 quick checks to find where your stock is quietly eating your cash. Tick each one you can honestly say **yes** to. Takes 10 minutes.

- [ ] **01 I know which products haven't sold in 90 days.**
  No sale in 90 days? Discount it, bundle it with a best-seller, or stop reordering it. Check monthly.

- [ ] **02 I reorder by sales speed, not the same amount for everything.**
  Fast movers get reordered more and more often. Slow movers get less, or nothing.

- [ ] **03 My top products have safety stock for supplier delays.**
  `daily sales × delay days` e.g. 20 × 5 = 100 units. A spare tire, not a second car.

- [ ] **04 I reorder at a set number, not when the shelf "looks low".**
  `daily sales × lead time + safety stock` e.g. 20 × 7 + 100 = 240 units.

- [ ] **05 I know my "A" products and check them every week.**
  About 20% of your products bring about 80% of sales. A: weekly · B: monthly · C: keep lean.

- [ ] **06 I plan with my supplier's real lead time, not the promised one.**
  Log your last 5 orders (order date → arrival date) and use the average.

- [ ] **07 My peak-season order goes out at least one lead time early.**
  `last peak sales × expected growth` e.g. 600 × 1.2 = 720 units.

- [ ] **08 I set prices from landed cost, not supplier price.**
  `supplier price + freight + duties + fees` e.g. $10 + 2.50 + 1.50 + 1 = $15.

7-8 ✓
Healthy. Keep checking monthly.

4-6 ✓
Some leaks. Fix the unticked ones first.

0-3 ✓
Cash is leaking. Start with 01 and 04.

Ticked fewer than 6?
Book a free 20-min stock check. We'll find your biggest leak together.
